

Social Patient Platform for MPN

What is our social Patient platform?

- A private portal for patient engagement
 - Unfiltered time line for posts
 - Private and public messaging
 - Newsfeed
 - Patient finder
 - Forum
 - Video meetings
 - Infocenter
- Event registration

Patient **empowerment** can only be increased by patient **interaction** and **engagement**. Our platform facilitates easy and effective communication between patients in the Netherlands

The power of Data

Because we offer a closed and secure private platform without tracking, filtering or algorithms, patients are willing to provide data about their MPN, medication, quality of life and treatments.

This gives us valuable insights in almost every aspect of MPN in a structured and scientifically valid way.

This helps us in our discussion with government, pharma and the medical community
